Linux

Linux (/ˈliːnʊks/ (listen) LEE-nuuks or /ˈlmʊks/ LIN-uuks)[11] is an open-source Unix-like operating system based on the Linux kernel,[12] an operating system kernel first released on September 17, 1991, by Linus Torvalds.[13][14][15] Linux is typically packaged as a Linux distribution.

Distributions include the Linux kernel and supporting <u>system software</u> and <u>libraries</u>, many of which are provided by the <u>GNU Project</u>. Many Linux distributions use the word "Linux" in their name, but the <u>Free Software Foundation</u> uses the name

"GNU/Linux" to emphasize the importance of GNU software, causing some controversy.[16][17]
